# Accessing Azure Lab ,and starting Cloudera in Lab VM

By Mohammmad Movhaedi
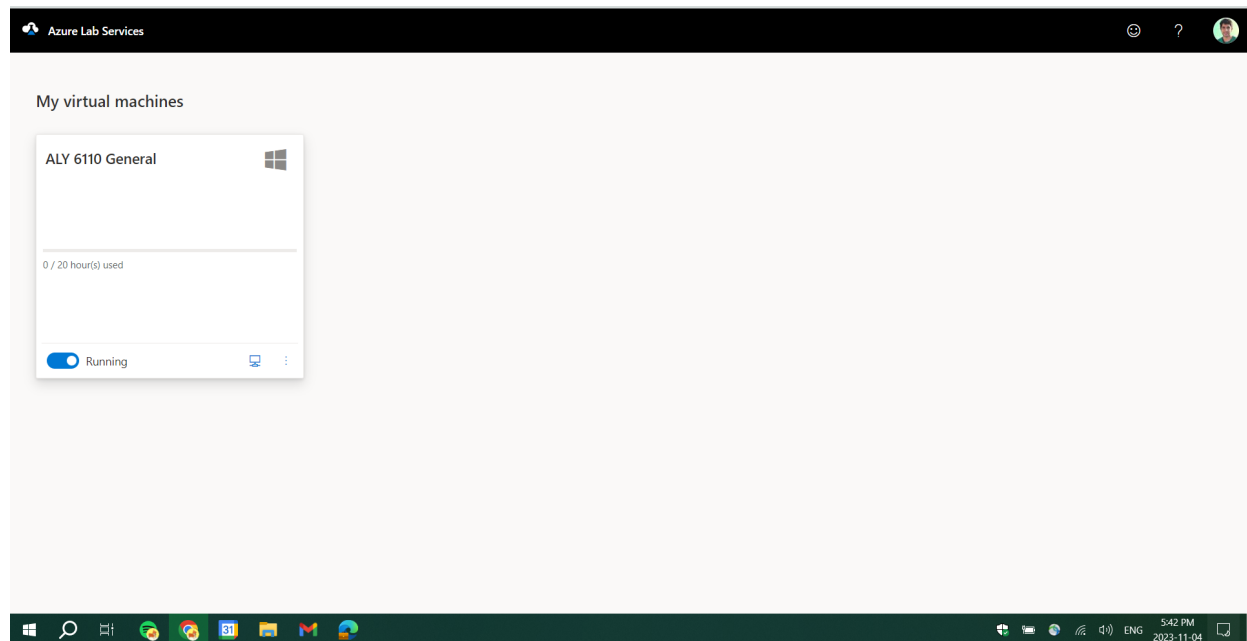

Introduction

In this document I'm going through steps of Accessing Azure Lab ,and starting Cloudera in Lab VM
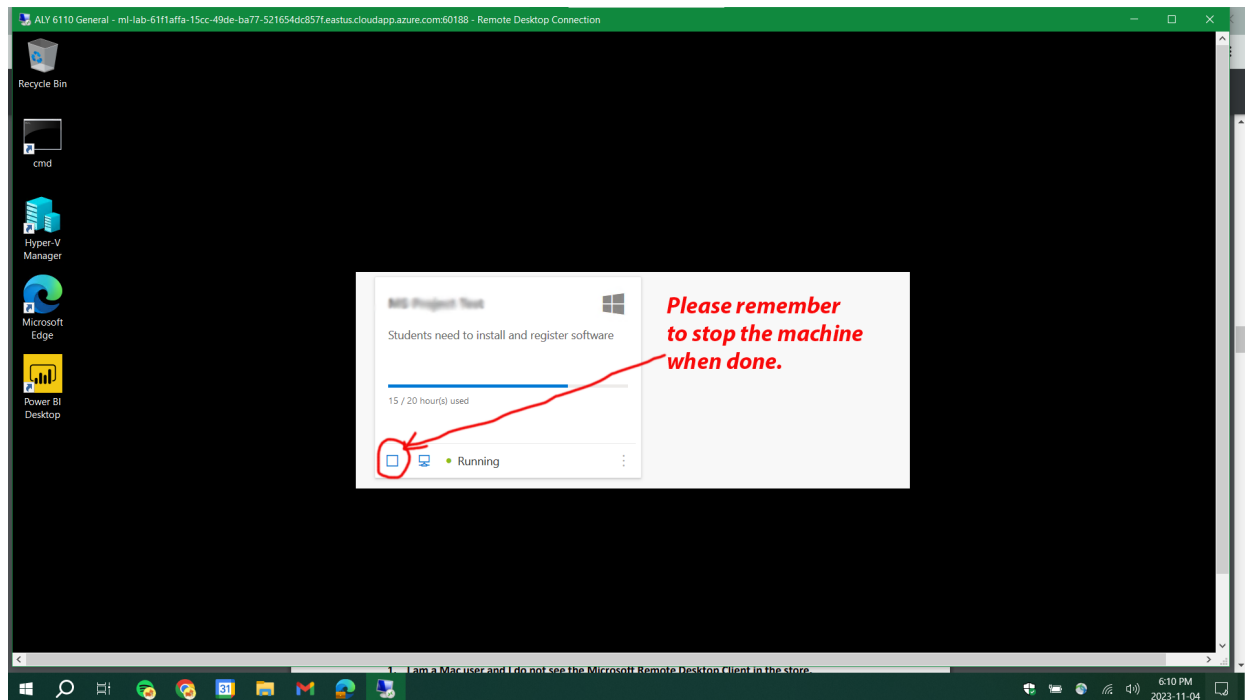

## Step 1 : Access Azure Lab Server through Chrome or Firefox

Step 2 : Navigate to the page showing assigned virtual machines, and start your machine by sliding the 'stopped' button to the right
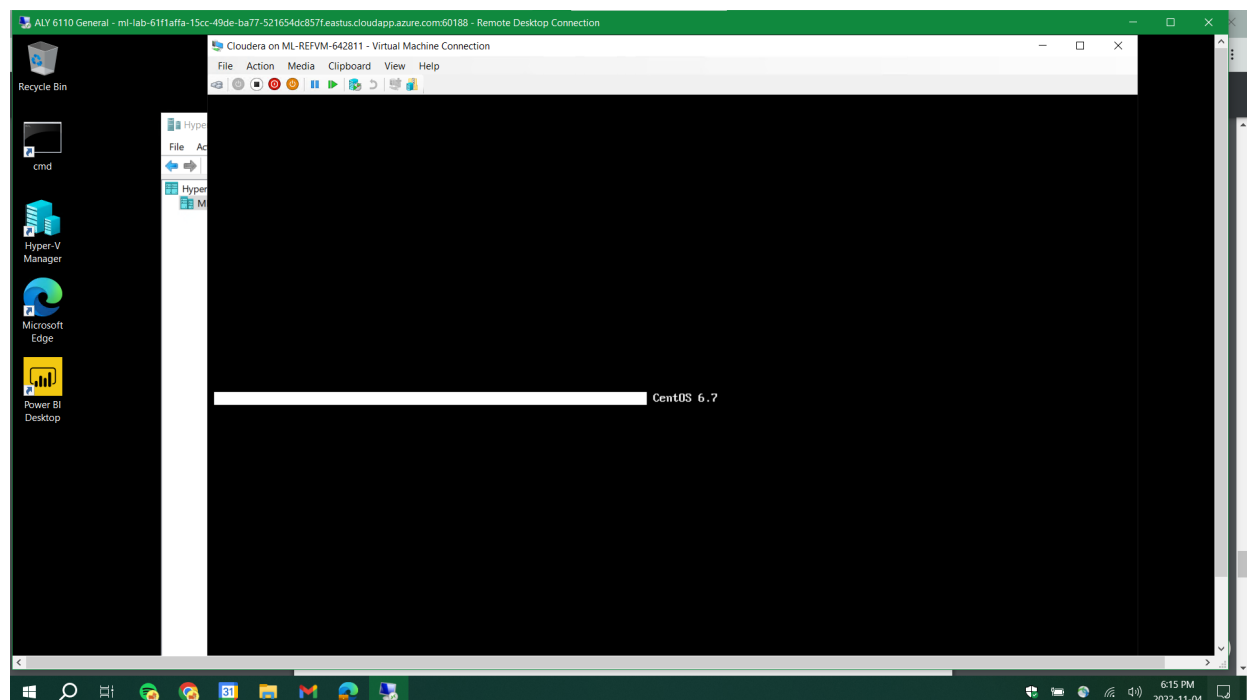

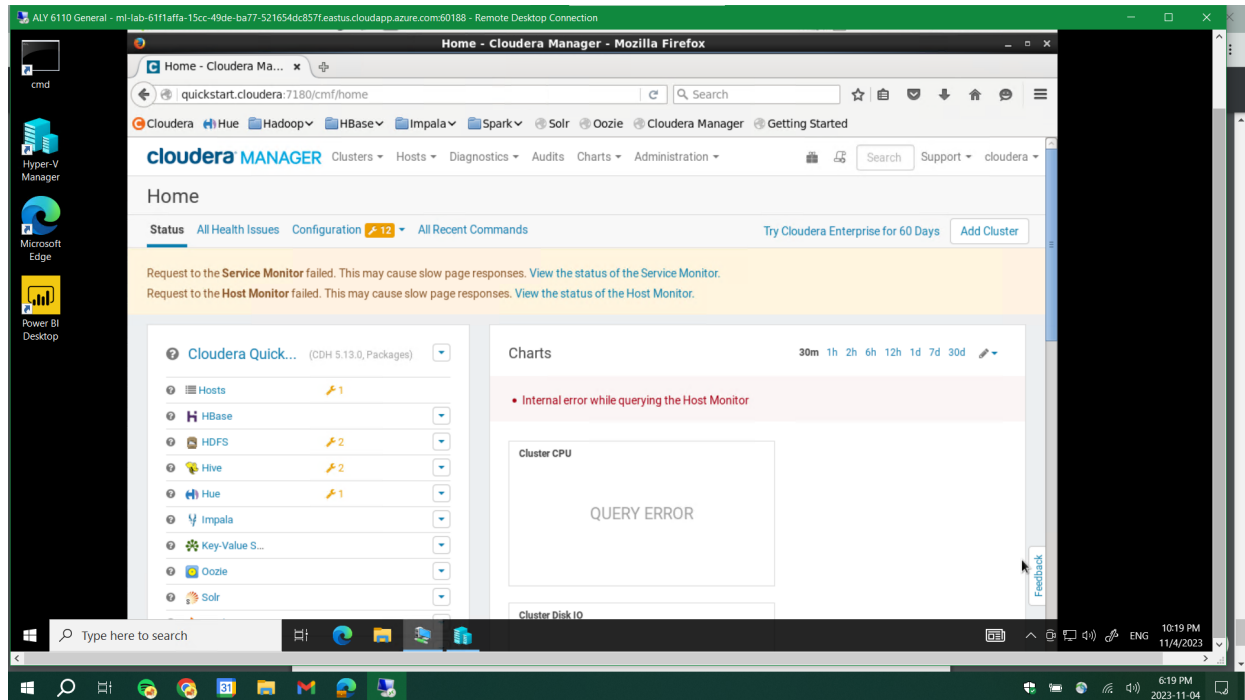

Step 3 : Connecting remotely

Step 4 : Accessing the Cloudera VM (via Azure Lab virtual machine)

Step 5 : Start the Cloudera VM using the 'Start' option in the right-hand menu, and wait for the state to indicate "Running".

Step 6 : login into Cloudera

c

In conclusion I was able to login to Cloudera following steps
